

Description

FiberPlex VCB breakout cables provide an easy solution for connecting to LightViper products.

Our VCB handcrafted 110-ohm digital audio snakes are perfect for multiple channel transmission of 110-ohm AES/EBU digital audio data, and come in both 8 channel and 16 channel configurations (2 audio channels per XLR per AES3).

Made with Gepco's thin profile flexible precision DS6 series digital snake cable, Neutrik XLR's and professional quality DB25 connectors, our digital snakes are ideal for multichannel AES breakouts from AD/DA converters, digital mixers, or digital multi-track recorders. Gepco DS6 series is characterized up to 25MHz for 192kHz transmission. Pairs are precision twisted with a non-conductive polyethylene filler rod, shielded, and isolated with color-coded pair jackets. Gepco's cable construction techniques lower attenuation, minimize crosstalk, and stabilizes the impedance, reducing cable induced bit-errors and jitter.

Digital Cables

Features:

- High quality copper breakout cables
- Standardized pinout
- Quality Neutrik connectors

Specifications

Conductor	26AWG
Impedance	110 Ω
Capacitance	14 pF/ft between conductors
Bandwidth	25MHz
Pair Shield	100% Foil
Dielectric	Foam Polypropylene
8 Pair Outer Diameter	.560in (14.2mm)
4 Pair Outer Diameter	.435in (11.1 mm)

Ordering Info

VCB-DDXM-15 - Digital 110-Ohm breakout cable, DB25 to (8) XLR male, 15'

VCB-DDXF-15 - Digital 110-Ohm breakout cabl, DB25 to (8) XLR female, 15'
