

# ADP-2981 and ADP-2982 SPEAKER

## Description

The ADP-2981 and ADP-2982 are wall mounted loudspeakers. The only difference between the two speakers is that the ADP-2981 has a strobe light annunciator. Both speakers have a port into which an FOI-4982 fiber optic amplifier can deliver sound on the 8 inch loudspeaker. Input and output jacks are also provided for cascading up to ten speakers for audio distribution as shown under "TYPICAL APPLICATION".

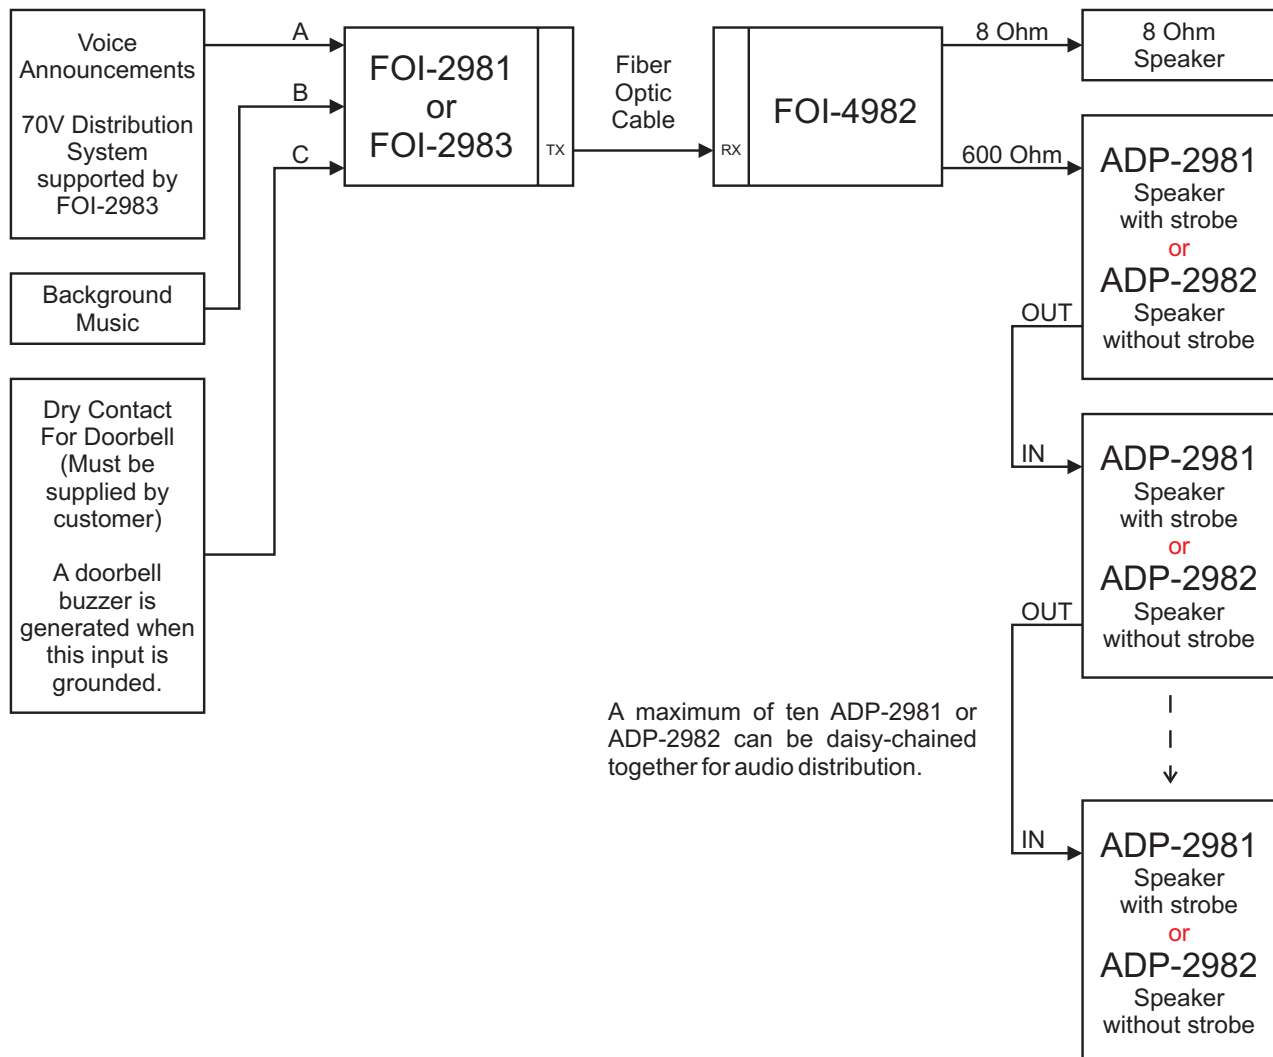

## Audio Accessories

- ADP-2981: Speaker with Strobe
- ADP-2982: Speaker without Strobe

## Features:

- Power for the FOI-2982 is supplied by both the ADP-2981 and the ADP-2982.

## Typical Application

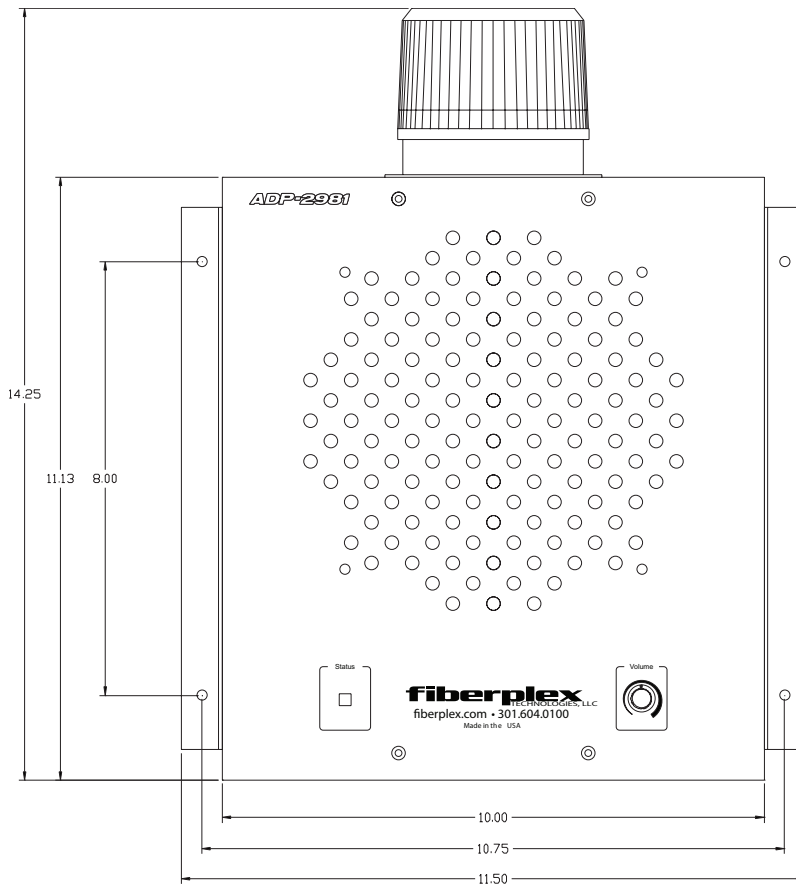

# ADP-2981 and ADP-2982

SPEAKER

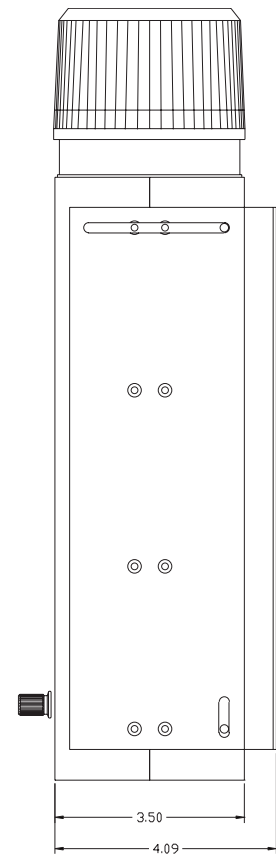

## Specifications
